ADVISORY INFORMATION

This Extension of authorisation relates to the use of 'Frutogard' (M19105) on beans without pods (fresh) for the control of downy mildew (*Peronospora viciae*).

Applications are to be made via horizontal boom sprayer and hand-held application (hydraulic nozzle) in a water volume of 300 to 1200 litres water per hectare.

IMPORTANT: When applying this product under the terms of this Extension of authorisation, comply with any resistance guidance or restrictions stated on the product label.

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating with different modes of action is a recognised anti-resistance strategy.

IMPORTANT: Goods treated under the terms of this Great Britain (GB) only authorisation can be legally marketed in Northern Ireland if they are being moved under the Northern Ireland Retail Movement Scheme. All other treated goods can only be marketed in Northern Ireland if they are in accordance with the statutory EU Maximum Residue Level (MRL) set under Regulation (EC) No 396/2005. This may also apply to residues in animal products where treated crops are fed to livestock. Growers are advised to draw this to the attention of distributors and retailers so that EU MRL breaches and any associated enforcement against goods marketed in Northern Ireland are avoided.

This Extension of authorisation relates to the use of 'Frutogard' (M19105)
