## ADVISORY INFORMATION

**IMPORTANT:** When applying this product under the terms of this Extension of authorisation, comply with any resistance guidance or restrictions stated on the product label.

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating with different modes of action is a recognised anti-resistance strategy.

'Versilus' contains the active substance benthiavalicarb-isopropyl, a CCA fungicide, apply CCA fungicides preferably in a preventive manner. Apply a maximum of 50% of the total number of intended applications for disease control. Alternation with fungicides having other modes of action is recommended in spray programs. For further advice on resistance management contact your agronomist, or specialist advisor, and visit the FRAG-UK website.

This Extension of authorisation relates to the use of 'Versilus' (M18618) for the control of downy mildew (*Peronospora destructor*) to be applied by horizontal boom sprayer in 200 to 300 litres water per hectare.

## APPENDIX 1: CONDITIONS OF EXTENSION OF AUTHORISATION

The conditions below are obligatory. They must be complied with when the Extension of authorisation occurs. Failure to comply with the following conditions will result in the withdrawal or amendment of the Extension of authorisation under Regulation (EC) No 1107/2009 and may result in other enforcement action, including prosecution. For the purposes of this Extension of authorisation only, the conditions and/or requirements shown below supersede any corresponding conditions and/or requirements set out on the label or otherwise provided for under the product authorisation **which would otherwise apply**.
