Extension of Authorisation Number: 0741 of 2026

EXTENSION OF AUTHORISATION FOR A MINOR USE OF A PLANT PROTECTION PRODUCT

PLANT PROTECTION PRODUCTS REGULATION No 1107/2009

Extent of authorisation:	Great Britain Only
Product name*:*	Arizona
Active ingredient*:*	500 g / l folpet
MAPP number*:*	21116
Product authorisation holder*:*	Adama Agricultural Solutions UK Ltd (Registered Company no. 2330985)
Marketing company*:*	Adama Agricultural Solutions UK Ltd

This Extension of authorisation ends: on the final expiry date of use for the authorised product

If the authorisation of the above product is withdrawn or amended, this Extension of authorisation will end on the same date as the authorisation for the product.

This Extension of authorisation will be withdrawn or amended before its end date if any of the active substances contained in the product are withdrawn from the GB Approvals Register, or if a decision is taken to withdraw or amend this Extension of authorisation under Regulation No 1107/2009 on any other grounds.

The circumstances in which this Extension of authorisation will be withdrawn or amended are set out in Regulation No 1107/2009.

This extension of authorisation for minor uses applies to all authorised parallel trade products issued under Article 52 of Regulation No 1107/2009 for which Arizona with MAPP 21116 is the reference product.

HSE Digital Signature

This and the attached Appendices 1 and 2 are signed by the Health and Safety Executive for and on behalf of the Secretary of State, the Welsh Ministers and the Scottish Ministers.

Date of issue: 27 April 2026

EXPLANATORY NOTES

1. This is Extension of authorisation number 0741 of 2026.

2. This Extension of authorisation will be published on HSE's website.

3. Application reference number: COP 2024/01500

4. Persons using the product to which this Extension of authorisation applies should acquaint themselves with and observe all requirements contained in the Regulation No 1107/2009, including the duty on the holder of any Extension of authorisation to notify information on potentially dangerous effects, a contravention of which is a criminal offence under those Regulations.

5. Neither the efficacy nor the phytotoxicity of the product for which this Extension of authorisation has been granted has been assessed and, as such, the user bears the risk in respect of failures concerning its efficacy and phytotoxicity.

6. In this notice Regulation No 1107/2009 means:
In relation to Great Britain, Assimilated Regulation No 1107/2009 as it has effect in Great Britain.

ADVISORY INFORMATION

This Extension of authorisation relates to the use of ‘Arizona’ (M21116) for the control of downy mildew, powdery mildew, fungal leaf spots, box blight, lupin anthracnose (*Colletotrichum acutatum*) , black spot (*Diplocarpon rosae*), white mould (*Ramularia vallisumbrosae*) and scab on container grown ornamental plant production (>1m in height) grown outdoors or in temporary protection to be applied via variable geometry boom sprayer, broadcast-air assist sprayer or hand-held application (hydraulic nozzle or misting) in 200 to 400 litres water per hectare.

IMPORTANT: When applying this product under the terms of this Extension of authorisation, comply with any resistance guidance or restrictions stated on the product label.
Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating with different modes of action is a recognised anti-resistance strategy.

IMPORTANT: Goods treated under the terms of this Great Britain (GB) only authorisation can be legally marketed in Northern Ireland if they are being moved under the Northern Ireland Retail Movement Scheme. All other treated goods can only be marketed in Northern Ireland if they are in accordance with the statutory EU Maximum Residue Level (MRL) set under Regulation (EC) No 396/2005. This may also apply to residues in animal products where treated crops are fed to livestock. Growers are advised to draw this to the attention of distributors and retailers so that EU MRL breaches and any associated enforcement against goods marketed in Northern Ireland are avoided.

APPENDIX 1: CONDITIONS OF EXTENSION OF AUTHORISATION

The conditions below are obligatory. They must be complied with when the Extension of authorisation occurs. Failure to comply with the following conditions will be likely to result in the withdrawal or amendment of the Extension of authorisation under Regulation No 1107/2009 and may result in other enforcement action, including prosecution. For the purposes of this Extension of authorisation only, the conditions and/or requirements shown below supersede any corresponding conditions and/or requirements set out on the label or otherwise provided for under the product authorisation **which would otherwise apply**.

Use:

Field of use: **ONLY AS AN AGRICULTURAL FUNGICIDE**

User: Professional

Crops/situations:	Maximum individual dose: (litres product / ha)	Maximum total dose: (litres product / ha / year)	Maximum number of treatments:	Latest time of application:
Container grown and outdoor and protected ornamental plant production	1.5	3	-	-

Operator Protection:

(1) Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment:

(a) Operators must wear suitable protective clothing (coveralls) and suitable protective gloves when handling the concentrate.

(b) Operators must wear suitable protective clothing* and suitable protective gloves when contact with treated foliage is unavoidable during application in protected situations. *Meeting at least clothing safety standard EN14605:2005 Type 3 (coveralls or jacket and trousers) for application to high crops or EN 14605:2005 Type PB [3] (trousers) for application to low crops.

(c) Workers must wear suitable protective gloves* when handling treated ornamental crops within 3 weeks post-treatment in outdoor situations. *Meeting at least glove safety standard EN374-2:2019, Level 2 and CE category III. Such gloves can be identified by a CE mark with four digits below, and the EN374 pictogram for micro-biological hazards.

(d) Workers must wear suitable protective clothing (in which arms, body and legs are fully covered) and suitable protective gloves* when re-entering protected treated areas or handling protected ornamental crops or contaminated surfaces for 11 weeks post-treatment. *Meeting at least glove safety standard EN374-2:2019, Level 2 and CE category III. Such gloves can be identified by a CE mark with four digits below, and the EN374 pictogram for micro-biological hazards.

(2) However, other engineering controls in addition to those specified above may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection.

Environmental protection:

(1) To protect aquatic organisms a 30m buffer zone is required.

(2) Crops/situations with >5m buffer zone:

Since there is a risk to aquatic life from use, direct spray from variable geometry boom sprayers and hand held sprayers must not be allowed to fall within the distance specified for the crop of the top of the bank of any static or flowing waterbody or within 1m of the top of a ditch which is dry at the time of application.

Spray must be aimed away from water.

(3) Since there is a risk to aquatic life from use, users not applying the statutory buffer zone must either themselves carry out, or ensure that someone else has carried out a Local Environment Risk Assessment for Pesticides (LERAP) on their behalf before each spraying operation from a broadcast air-assisted sprayer. Users must not allow direct spray from such sprayers to fall within 30m of the top of the bank of any static or flowing waterbody or within

5m of a ditch which is dry at the time of application (these distances to be measured as set out in the booklet ‘Local Environment Risk Assessment for Pesticides - Broadcast Air-assisted Sprayers’ - and any amendments that are made to it) unless:

((3) Since there is a risk to aquatic life from use, users not applying the statutory buffer zone must either themselves carry out, or ensure that someone else has carried out a Local Environment Risk Assessment for Pesticides (LERAP) on their behalf before each spraying operation from a broadcast air-assisted sprayer. Users must not allow direct spray from such sprayers to fall within 30m of the top of the bank of any static or flowing waterbody or within 5m of a ditch which is dry at the time of application (these distances to be measured as set out in the booklet ‘Local Environment Risk Assessment for Pesticides - Broadcast Air-assisted Sprayers’ - and any amendments that are made to it) unless:

(a) The LERAP indicates that a narrower buffer zone will be sufficient; and

(b) Any measures indicated by the LERAP as justifying the narrower buffer zone are complied with in full and in accordance with any conditions applicable to them.

Spray must be aimed away from water.

(4) Buffer zones must be measured in accordance with the guidance set out in the HSE Chemicals Regulation Division’s website and any amendments made to it.

(5) Detailed guidance on LERAPs and how to conduct a LERAP are contained in the booklets ‘Local Environment Risk Assessment for Pesticides - Horizontal Boom Sprayers’ and ‘Local Environment Risk Assessment for Pesticides - Broadcast Air-assisted Sprayers’, available from HSE Chemicals Regulation Division’s website. All LERAPs must be carried out in accordance with this Guidance and any amendments that are made to it.

(6) The results of the LERAP must be recorded in written form and must be available for a period of three years for inspection to any person entitled to exercise enforcement powers under or in connection with the Plant Protection Products Regulations 2011 or the Plant Protection Products (Sustainable Use) Regulations 2012. (An electronic record will satisfy

the requirement for a written record, providing it is similarly available for inspection and can be copied).

(7) Buffer zones greater than 5m are NOT eligible for buffer zone reduction under the horizontal boom LERAP scheme.

Other specific restrictions:

(1) This product must only be applied in accordance with the terms of this extension of authorisation, the product label and/or leaflet and any additional guidance on extensions of authorisation.

(2) The product must only be used on container grown ornamentals above the height of 1m, limited , container HNS and nursery trees (fruit and Christmas).

(3) Only crops grown in organic media, such as soil or compost, either in containers or on impervious surfaces. Not to be used on crops planted directly in the ground.

(4) Fruit must not be harvested for 12 months following treatment.

(5) When applying with pedestrian-controlled equipment with vertical or horizonal boom only apply by pulling equipment backwards and not pushing equipment forwards through the crop.

(6) Managers must carry out a thermal comfort checklist (see - http://www.hse.gov.uk/temperature/assets/docs/thermal-comfort-checklist.pdf) prior to worker re-entry tasks. If needed, an additional heat stress check list and associated risk assessment must be undertaken (see- http://www.hse.gov.uk/temperature/assets/docs/heat-stress-checklist.pdf) and the records retained. Temperature and humidity inside tunnels should be monitored during re-entry tasks. If conditions become such that there is a risk of heat related illness, or workers complain of ill effects, then work must cease until the risk is reduced. It is not acceptable for workers to remove clothing and continue working.

APPENDIX 2: GENERAL CONDITIONS FOR AN EXTENSION OF AUTHORISATION

Failure to comply with the following conditions will be likely to result in the withdrawal or amendment of the Extension of authorisation under Regulation No 1107/2009 and may result in other enforcement action, including prosecution.

Adverse effects:

The authorisation holder must immediately notify the Secretary of State, the Welsh Ministers and the Scottish Ministers, if they have any new information on the potentially adverse effects of the authorised product, or of residues of an active substance in that product when used in accordance with the conditions of this authorisation. Failure to comply with this requirement is an offence.

Provision of information:

The authorisation holder must comply with all requests for information required by, or on behalf of, the Secretary of State, the Welsh Ministers or the Scottish Ministers in accordance with Assimilated Regulation No 1107/2009.
